***Detailed Action***

***Examiners Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mike Amerson on 11-30-2005. The changes made below are underlined.

The Claims are amended as follows;

-- Claim 13 (Currently Amended): A method of controlling characteristics of an ion beam, the method comprising:

obtaining subsequent sets of measurement readings from a plurality of Faraday cups, each Faraday cup being arranged relative to said ion beam so as to receive a portion of said ion beam, each set of measurement readings gathered within a specified time interval, wherein each of said Faraday cups comprises:

a cup body having a bottom portion, sidewalls and an entrance aperture opposite to said bottom portion;

a first conductive region formed on said cup body and having a first detection surface oriented along a first direction; and

a second conductive region formed on said cup body, electrically insulated from said first conductive region and having a second detection surface oriented along a second direction that is different from said first direction wherein said first and second conductive regions are formed on said sidewalls in a substantially opposing relationship; and

adjusting at least one tool parameter related to said beam characteristics on the basis of said subsequent sets of measurement readings. --

***Allowable Subject Matter***

2. Claims 1,5-26, and 30-38 are allowed

***Examiner's statement of reasons for allowance***

The following is an examiner's statement of reasons for allowance:

3. Claims 1,13, and 26 are allowed because prior art fails to show an ion beam detector and method of controlling an ion beam using a plurality of Faraday cups each arranged relative to the ion beam so as to receive a portion of the beam, wherein each of the Faraday cups comprises; a cup body having a bottom portion, sidewalls and an entrance aperture opposite to said bottom portion; a first conductive region formed on said Faraday cup body and having a first detection surface oriented along a first direction; and a second conductive region formed on the Faraday cup body, electrically insulated from the first conductive region and having a second detection

surface oriented along a second direction that is different from the first direction wherein the first and second conductive regions are formed on the sidewalls in a substantially opposing relationship.

4. Claims 5-12, 14-25, and 30-38 are allowed by virtue of their dependency upon allowed claims 1, 13, and 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
